ABSTRACT

The state of Maryland Interagency Committee on Public School Construction has attempted to improve minority business-enterprise participation in public-school construction projects funded through the state's Public School Construction Program. This report describes outcomes of the committee's efforts during fiscal year 1995. The first section briefly summarizes major program activities to improve the participation of minority business enterprises in school construction projects. The second section describes how the Public School Construction Program was created and presents data on minority business-enterprise participation for state funds during 1995. During 1995, the committee awarded contracts for 119 projects. The minority business-enterprise participation in total contract costs was almost $9 million, or 3.75 percent. Data also show minority business-enterprise participation for state funds for the years 1990-95. Section 3 highlights the direct contracts and purchases of the Public School Construction Program. Contact information and 1995 data on state-funded school-construction contracts, state funds paid to minority business enterprises, and public school construction-program operational expenditures are included. (LMI).

INTRODUCTION

The Interagency Committee and its staff, during the twelve-month period covered by this report, have attempted to improve minority business enterprise participation in public school construction projects funded through the State of Maryland's Public School Construction Program.

This report is divided into three sections. The first section briefly summarizes the major activities in which we have been involved. The second section pertains to minority business enterprise participation in public school construction projects, and the third section refers to the direct contracts and purchases of our agency.

SECTION I

Public School Construction Program Activities to Improve Minority Business Enterprise Participation

The Interagency Committee on Public School Construction and its staff have engaged in a number of activities designed to improve minority business enterprise participation in Public School Construction Program funded projects. Each activity is briefly summarized below:

(a) Serve on the Governor's Office of Minority Affairs Inter-Departmental Advisory Council;

(b) Developed, maintained, and distributed a list of minority business enterprise associations, commissions, etc. who receive notices directly from the local educational agency when projects are bid;

(c) Attended, participated, was represented, or made presentations to meetings/conferences with outreach programs, minority business associations, minority contractors, non-minority contractors, school business officials, and worked with other State agencies;

(d) Worked with the contact person in the local education agencies to encourage and support the MBE program;

(e) Assisted local education agencies in their review of MBE materials for contract award;

(f) Distributed copies of the State of Maryland's Minority Business Enterprise Directory of certified MBEs to local education agencies; and

(g) Prepared letters to minority business enterprises to encourage their participation in State funded school construction projects; to seek State certification; and to provide information regarding contract opportunities.

SECTION II

State Funds Contracted Through Local Education Agencies

The Public School Construction Program was created by an act of the Maryland General Assembly in 1971 to provide funds for eligible public school construction capital improvement costs in each school system of the State. Eligible costs have changed since the inception of the program. Currently the board of education of each school system enters into contracts for the construction of pubic school buildings (new construction and renovations), systemic renovation projects, and the movement of State-owned relocatable classroom buildings, with partial State funding.

On August 15, 1979, the Board of Public Works approved a revision to the Rules, Regulations, and Procedures for the Administration of the School Construction Program which required each board of education to adopt a procedure to attempt to include minority business enterprises in Public School Construction Program projects. The requirements became effective for all projects advertised for bid after October 1, 1979. Each board of education that would utilize State funds through the Public School Construction Program adopted a procedure that had been approved by the Interagency Committee.

House Bill 259 of the 1983 legislative session required the Board of Public Works to adopt regulations for the State's minority business enterprise program. After the Board of Public Works approved final regulations concerning the State's Minority Business Program (5/84), each local board of education was required to adopt or adapt a revised procedure. As of June 30, 1986, all 24 boards of education had approved a revised MBE procedure.

On December 30, 1987, the Board of Public Works amended the Rules, Regulations, and Procedures for the Administration of the School Construction Program which established a State/local shared cost formula for school construction projects. These percentages were revised by the Board on October 6, 1993 and vary from 50 percent State funding in the wealthier jurisdictions to 80 percent in the poorest jurisdiction. State funds for school construction increased (state-wide) with a requirement for increased amounts of local funding for each construction contract.

The Interagency Committee on Public School Construction, during fiscal year 1995, approved the award of contracts for one-hundred nineteen (119) construction/systemic renovation/relocatable projects totaling $239,781,431 of which State participation was limited to $88,248,057. The minority business enterprise participation in the State funded portions of these construction projects is $8,215,891 or 9.31 percent. The minority business enterprise participation in total contract costs was $8,993,296 or 3.75 percent. Of the one-hundred nineteen projects, sixty-five (65) had some level of minority business enterprise participation. This represents 54.62 percent of all construction contracts and includes one-hundred and fourty-one (141) individual contracts or subcontracts with certified minority business enterprises. It should be noted that of the fifty-four (54) projects without MBE participation, thirty-four (34) were for repairs to relocatable classroom

buildings, the movement of relocatable classroom buildings, or systemic renovation projects which provided very limited opportunities for subcontracting. It should also be noted that several projects had levels of MBE participation in excess of 10 percent.

The one-hundred nineteen (119) projects can be divided into those of $100,000 or less and those over $100,000 of approved total costs. Thirteen (13) were $100,000 or less and one-hundred six (106) projects were over $100,000. Exceptions were requested and approved for the ten (10) projects that were under $100,000 where the contractor was unable to obtain at least 10 percent minority business enterprise participation. For the one-hundred six (106) contracts over $100,000, there were eighty-nine (89) exceptions requested and approved where the contractor was unable to obtain at least 10 percent minority business enterprise participation.

It should also be noted that of the one-hundred six (106) projects that were over $100,000, there were twenty-three (23) projects (representing 21.7 percent of these projects) that were for systemic renovations (mostly roof replacements) with total contract costs between $100,000 and $300,000. Only ten (10) of these projects (43.48 percent) had some level of MBE participation due to the extremely limited opportunities for subcontracting.

The minority business enterprise participation for State funds in school construction projects for the past several years is shown below:

	State Funds	MBE	MBE %
FY'90	$52,423,494	$ 8,409,473	16.04
FY'91	$89,487,005	$20,108,334	22.47
FY'92	$84,691,012	$15,852,342	18.72
FY'93	$41,706,575	$ 9,876,957	23.68
FY'94	$71,882,490	$10,180,834	14.16
FY'95	$88,248,057	$ 8,215,891	9.31

The minority business enterprise participation in the number of projects and the number of minority prime contractor or subcontractor occurrences is shown below for the past several years:

Year	Projects Approved	Number with MBE Participation	Percent of Projects with MBEs	Number of MBE Prime or Subcontractors
FY'90	71	31	43.66	71
FY'91	78	47	60.26	153
FY'92	90	54	60.00	149
FY'93	92	43	46.74	90
FY'94	99	45	45.45	112
FY'95	119	65	54.62	141

The information presented above for fiscal year 1995 was obtained from information submitted from each board of education. It has been consolidated and appears as Exhibit A.

The information that follows pertains to the distribution of the funds for the contracts approved for the one-hundred nineteen projects in Fiscal Year 1995. Several of the projects were accomplished through multiple contracts. In some cases this afforded minority business enterprises to be the contractor (prime) directly with a local board of education. State funds for certified minority businesses totaled $8,215,891. The supporting data for the information by project, with the prime contractor, the identified minority business enterprise, and the amount each MBE contract is presented within Exhibit A.

The distribution of funding by minority business enterprise category is shown below for all projects.

Code	Minority Category	Total $	Total %
1	African Americans	$1,656,925	18.42
2	Hispanics	532,862	5.93
3	American Indians	8,900	.10
4	Asians	299,010	3.32
5	Females	6,495,599	72.23
6	Physically or mentally disabled	-0-	-0-
	Total	$8,993,296	100.0

119 projects - Total of State funds	
13 under $100,000	$ 496,812
106 over $100,000	87,751,245
	$88,248,057

13 under $100,000 - State funds		
6 projects with MBE participation		
MBE participation - $35,077		
2 sub contracts - African American	$20,000	57.02
1 prime contract - Hispanic	6,076	17.32
3 sub contracts - Female	9,001	25.66
	$35,077	100.00

106 projects over $100,000		
59 projects with MBE participation		
MBE participation - $8,958,219		
prime contracts/sub contracts	141	
African Americans	$1,636,925	18.27
Hispanics	526,786	5.88
American Indians	8,900	.1
Asians	299,010	3.34
Females	6,486,598	72.41
	8,958,219	100.0

We are aware of a number of situations where the prime contractors are continuing to seek certified minority business enterprise subcontracts for projects already awarded to improve the MBE participation levels.

The information presented above and in Exhibit A reflects the anticipated certified minority business enterprise participation identified at the time of contract award and/or additional certified minority business enterprise participation obtained after contract award.

* * * *

The data and information presented below and in Exhibit B reflects the actual State funds that were paid to minority business enterprises during fiscal year 1995. During fiscal year 1995 the State advanced a total of $100,767,253 to prime contractors or payments to local boards of education for State funded public school construction projects. Minority business enterprises were paid $5,902,292 which is 5.86 percent of the total State funds disbursed in fiscal year 1995. These funds to certified MBEs were advanced for forty-six (46) projects which did involve ninety-seven (97) separate contracts with either a minority prime contractor or minority subcontractor. The distribution by minority category is shown below with the number of contracts.

Code	Minority Category	State $ Paid	%	Number of MBE Prime or Subcontractors
1	African Americans	$2,222,924	37.66	38
2	Hispanics	420,582	7.13	10
3	American Indians	285	.01	1
4	Asians	13,860	.23	2
5	Females	3,244,641	54.97	46
6	Physically or mentally disabled	-0-	0.00	0
	Total	$5,902,292	100.00	97

It should be noted and recognized that there is no direct correlation between the projects and contracts approved by the Interagency Committee in fiscal year 1995 (Exhibit A) and State Funds paid to contractors in fiscal year 1995 (Exhibit B). Some of the funds paid by the State in fiscal year 1995 were for contracts approved in either fiscal year 1993, 1994 or 1995. It should also be recognized that some of the State funded public school construction projects take 18-30 months to construct. Minority business enterprises, although identified at the time of contract award, could be working on a project at any point during one of possibly three fiscal years. Some of the State funds paid to one or two school systems were for reimbursement for payments that they made in a prior fiscal year. They used their (local) funds to pay contractors, including some minority business enterprises, in a prior fiscal year and then received State funds as a reimbursement in fiscal year 1995. These State funds were therefore not paid to contractors or minority business enterprises in fiscal year 1995.

SECTION III

Direct Contracts and Purchases of the Public School Construction Program

Included within the operational budget of the Public School Construction Program are four line item categories which are included in this report pertaining to minority business enterprise participation. We have implemented procedures to obtain goods and/or services (other than from State agencies) within these categories from minority business enterprises to the greatest extent possible.

The total expenditures by our agency in these categories were $13,450 of which $5,800 or 43.12 percent was from State contracts with the Department of General Services. The balance of $7,650 (56.88 percent) was purchased from "off-contract" sources. Minority business enterprise participation was $243 (1.81 percent) for all expenditures. The purchases made "off-contract" totaled $7,650, with $243 or 3.18 percent of the funds going to minority business enterprises. The total expenditures for our agency are presented in Exhibit C.

Attempts were made to obtain price quotations from minority business enterprises for the purchase of office supplies for off-contract items. Although discounts were offered for the catalog items, they were not at or below prices offered by other non-MBE suppliers. On several occasions prices were not given from the MBE for the small quantity to be purchases due to their cost to deliver the item.

It should be noted that we are unable to determine if any of the purchases made from State contracts through DGS (43.12 percent of the expenditures) were from any minority business enterprises. Furthermore, all of the purchases made by our agency during fiscal year 1995 have been reported to the Department of General Services, including both State contract and off-contract items.

SUMMARY

We intend to continue to work with the local boards of education, contractors, minority business enterprise associations and commissions, minority subcontractors and vendors, and other State and local agencies to improve and increase minority business enterprise participation in Public School Construction Program projects. We are prepared to meet with the individuals and/or groups identified to review and analyze the current status of minority business participation and to develop appropriate steps and activities to improve upon these figures.

The Interagency Committee is prepared to attend state-wide or regional outreach programs to explain our MBE program, the types of projects funded, how MBEs can participate in the program, who they can contact for specific project information, and how to establish relationships with public school system personnel and prime contractors.

The Executive Director is responsible for the administration, management, operation, and monitoring of the Minority Business Enterprise Program for the Public School Construction Program. For further information, contact:
